Former Vice President Joseph Biden Jr has won the key states of Pennsylvania and Georgia exceeding the 270 electoral college votes he needs to win the presidential election. Mr Biden will move quickly to form a presidential transition team to consider appointees and advisers for his new administration. A Biden Presidency will promote a New Green Finance revolution for the US economy and will more actively combat the Covid-19 crisis. He will rebuild America's Atlantic Alliance with its European partners, and support a stronger role for America in developing multilateral alliances to support America's security and economic interests. He will also appoint cabinet secretaries who will support public education and protect the environment.
